

Coal Operators To Fight On For Ontario Market

At Meeting in Calgary, the Domestic Producers Decide to Continue Publicity

Following a meeting of the domestic coal operators at the Palace hotel, Calgary, Wednesday, Howard Stutchbury, Alberta trade commissioner, announced that the coal operators had decided to carry on their publicity campaign in Ontario and put forth every possible effort to help the government take immediate action concerning the railway problem.

"At the coal exhibit in Toronto this year," said Mr. Stutchbury, "over seventy thousand people had the opportunity of coming into personal contact with those people who had used, and wanted to use, Canadian coal. The interest aroused by this display was enormous. The one question which was repeated again and again was, 'How soon can we get it?'"

"A great number of Americans were present at this exhibition and expressed both astonishment and keen interest at the fact that Canada possessed so much coal. Anthracite is at the present time selling at \$1.00 above our Canadian price, while Hamilton is able to buy coke at the great reduction of \$1.50 in the Cleveland price."

That Canadian coal enthusiasm for the sale of their own goods was strongly emphasized by Mr. Stutchbury. "The American nation as a whole are extremely interested in the produce of their own country. They talk about it, digest it and literally sell it. Our motto should be 'Boost Canada and Canadian Goods,'" continued Mr. Stutchbury. "It is only by taking an intense interest in our own output that we will eventually lead to the ultimate sale of our produce."

Mr. Stutchbury said that he felt confident that the government had thoroughly realized the national economic importance of the Canadian fuel independence and he expressed his belief that the government would find a way by which it would be possible to move Alberta coal to Ontario, to compete with foreign produce.

The decision from the government is being anxiously awaited by the domestic operators who hope that the opportunity will be afforded them to move the coal as soon as the grain rush is over.

Pythian Sisters Entertained Grand Chief on Monday

Mrs. J. Richards entertained at her home on Monday in honor of Mrs. Powell, of Wayne, Alta., the provincial grand chief of the Pythian sisters. About thirty guests were present. Mrs. Muir and Mrs. Hadley assisted in serving tea, and Mrs. Glendenning cut the loaves. Mrs. Powell sang a beautiful solo entitled "My Task," and Mrs. Phillips, Mrs. Nelson and Mrs. Couvins also sang. Mrs. Glendenning gave a recitation entitled "Guilt or Not Guilty." The afternoon passed most pleasantly and gave quite a large number the opportunity of greeting Mrs. Powell.

On Friday and Saturday at the Palace theatre the big feature will be the story of Peter B. Kyne's novel "The Understanding Heart." It is an eight-act picture. There will also be the Fox Weekly News and comedy. Usual prices.

Entertainment by Miss Siegel Was Enjoyed

A very enjoyable entertainment was given on Tuesday evening in the United Church by Miss Theresa M. Siegel, dramatic reader, whose humorous program delighted young and old. Every number was splendidly given, and it would be hard to pick out any for special mention. Perhaps the most amusing from the humorous viewpoint was that of a colored lovesick swain who in trying to emulate the gallant knight of old, Lochinvar, donned a suit of armor made of tin and on serenading his dusky bride-to-be, was mistaken as a highway robber by the lady's father, who caused a stampede of the would be husband and his mule by discharging a shotgun when the serenade was at its height. The conclusion shows the victim madly galloping away yelling "Amelia, I've got to leave you," the part being given in a realistic manner by Miss Siegel as she imitates Sambo and his mule galloping from the scene of the shooting.

Very good also was the story of the school principal, a Miss Miller, whose outlook on the closing days of life were brightened by a very tangible form of appreciation by her old pupils.

Assisting in the program were Alfred Phillips, who gave three baritone selections, and Sidney White, whose violin selections were exceptionally well rendered. The accompaniments were played in a very capable style by Mr. J. Emerson. At the close of the program the Rev. H. J. Bevan tendered a vote of thanks to the artistess which was heartily concurred in by the audience.

The favorable impression created by Miss Siegel's first visit to Coleman will undoubtedly make her a welcome visitor on future occasions.

Total Tax Rate 20 Mills for 1927

The tax levy as decided on by the assessment committee of the town council is 18 mills general and 2 mills supplementary revenue. A rate of 10 per cent. will be allowed on current taxes paid before Oct. 31, and if not paid by the end of December a penalty of 5 per cent. will be added, and an additional 5 per cent. for every six months they remain unpaid.

Water Causing Trouble

The proprietors of the Grand Union hotel have sent in a written request to the town council to have a sewer constructed from the hotel to take off the surplus water from their premises, for which they are willing to bear part of the cost. During the recent heavy rains the water could not get away fast enough, causing some inconvenience. No decision has yet been reached by the council.

Calgary Ministerial Association presented the Rev. Capt. Muncester, veteran divine of Blairmore, now living in Calgary, with a purse of gold in honor of the celebration of his golden wedding anniversary. In acknowledging the presentation, Mr. Muncester spoke of the great inspirations that have come to him during his service in the ministry and he referred to the great assistance given him in his work by his wife. The 50 years of matrimony had brought great tender memories of sacrifices shared.

Coleman Schools Win Diploma

The following communication was received by Secretary J. Ford from the Supervisor of Schools, in connection with the school fair held at Coleman.

"We are advised by the Department of Agriculture that your school was successful in winning the diploma for the best exhibit of school work at the fair held at Coleman on September 3, 1925 and Sept. 16, 1926. I am therefore forwarding diploma No. 82 and 83 which have been awarded to Grade 7 and Grades 6 and 7, respectively."—G. Fred McNally, Supervisor of Schools.

Blairmore Adopts Preventive Measures

Asks Co-Operation of Surrounding Towns in Preventive Measures Against Development of Infantile Paralysis

The Board of Health of Blairmore met on Tuesday last week and passed the following resolutions: "That all picture shows be closed indefinitely to persons under the age of 18 years; that all public dances be closed indefinitely."

That the chairman of Blairmore Board of Health request Coleman Board of Health to do likewise.

In a communication to Coleman Board of Health, J. E. Gillis, chairman of Blairmore Board, states that the Board of Health there deems the situation to be possibly serious in view of the evident fact that the disease is one which apparently requires more prevention than cure, and accordingly I would suggest that you ask your board to take the precautions which we have deemed necessary.

The local board of health, consisting of Mayor Burne, Dr. Borden and the council, have kept a watchful eye on the situation, and though they have not restricted the attendance at picture shows, yet should any cases develop, it is probable they will curtail the attendance of children at the theatre.

The regulations of the Blairmore Board of Health will apply to Frank, Bellevue, Hillcrest and surrounding districts under the jurisdiction of Dr. Joseph Olivier, who has been appointed by the Department of Health to undertake necessary investigations and precautionary measures in Improvement District No. 71 and in Municipal District No. 70.

Getting After Peddlers

At a recent meeting of the town council it was decided to impose a license of \$25 on itinerant traders or peddlers who sell fruit or farm produce not grown by themselves. This amendment to an existing by-law was deemed necessary owing to the fact that peddlers were shipping in fruit and produce from outside points and selling it from door to door.

The harvest is now proceeding rapidly that a grain train passes every thirty minutes throughout the day and night over the main line of the C.P.R. Alberta, it is estimated, is contributing a third of the grain crop of the Dominion this year.

Crow's Nest Pass Mission

St. Alban's, Coleman, Holy Communion on Sunday at 11 a. m.

St. Luke's, Blairmore, 7 p. m., harvest festival. Mrs. Ashbridge will sing a solo at St. Luke's.

Sunday, October 9th, harvest festival services will be held at St. Alban's, Coleman. The preacher will be the Rev. V. S. Lord of the Indian school at Brocket. There will also be special music.

The incumbent and wardens hope that the collection at the harvest festival will be a good one so that this year we may end up the year with no debts. A sum of about \$200 is needed to do this, over and above the usual collections.

Order in Good Time

For a variety of high class personal greeting cards for Christmas the examples at The Journal's office are unexcelled. We have over a hundred designs to choose from, either for business or private use, and would be pleased to show samples to any person interested or will send same on receiving a telephone call at 209.

It would be advisable to order early, as cards can then be delivered at your convenience, and avoid the annoyance and uncertainty of last minute deliveries.

Alberta Sugar Demonstration

A demonstration of Alberta sugar, manufactured at the Raymond refineries, was given this week at the store of Lecky & Leduc, and excited considerable interest. It was in charge of Mrs. W. Wilson, of Calgary, who showed samples of preserved fruit, icing, candy and other articles made from this sugar. The industry has made a wonderful increase and greater things are predicted for the sugar industry in Alberta, for not only has it brought price down very considerably, but it has proved its merit against the imported sugars from other countries.

St. Alban's W. A. Notes

The Ladies of St. Alban's W. A. are planning to hold a sale of work on Saturday, December 10, in the K. of P. hall. There will be a variety of fancy and useful articles suitable for Christmas gifts.

The prize winners at the wheel drive on Saturday last were as follows: Gent's first, Mr. G. A. Brown; second, Rev. A. D. Currie. Ladies first, Mrs. Hancock; second, Mrs. G. A. Brown. Another of these wheel drives will be held next Saturday, and the prizes are well worth having.

Third Teacher for Coleman High School

New Appointee is Graduate of Boston University and Comes Well Recommended

At a special meeting of the school board the application of Miss Harriette Gomez as teacher in the high school here was accepted. The new teacher taught in the United States following her graduation from Boston University with the M. A. degree, and took graduate work for two summer sessions at Harvard University.

She also holds the academic teacher's certificate for Alberta, and is well qualified for the position, having specialized in English and the teaching of English literature and composition.

Presentation of Prizes to St. John Ambulance Teams

Sense of Duty and Service to Humanity is Guiding Spirit of Those Engaged in First Aid--Work of Local Teams Eulogized by Speakers at Presentation

On Monday evening in the K. of P. hall, presentation of certificates to the third year members of the St. John Ambulance Association was made, besides the diplomas for the Wallace Nesbitt competition, in which Coleman Tuxis team were given a special award by the Dominion headquarters.

The chairman was Mr. D. Davidson, who spoke on the importance of the work of the St. John Ambulance Association, and of the increased interest shown in the Crow's Nest Pass. It is hoped that next year their activities would be increased so that competitions would be held for the whole of the Pass, from which teams would be selected to enter the Dominion competitions.

Miner Inspector Johnston prior to presenting the certificates, remarked on the support given by Coleman towards the work of the Association, and though the attendance this evening was not as large as expected, yet there was satisfaction in knowing that Coleman had always readily given financial assistance when required. He learned from the chairman that Coleman branch had a surplus of over \$300, and if any further financial aid was required it would be readily forthcoming.

This year's prizes for the district competitions had cost \$540, and it had been the aim of the committee to offer as good prizes as possible, for though the monetary value of prizes would never compensate the members for the time and effort expended in the work, yet the committee felt that they should encourage the work to the full extent of their power.

The prizes were awarded as follows:

Tuxis No. 1 Team, awarded prizes for Wallace Nesbitt competition, and for Intermediate exams. St. John Ambulance Association and first prize for First Aid competition at Bellevue exhibition: Mack Hall, Fraser McLeod, Dave Flynn and Robert Wilson.

Tuxis No. 2 Team, Fourth prize at Bellevue exhibition, and intermediate certificates from St. John Ambulance Association: Hugh Danlop, captain; William Balloch, Alex. Balloch, Sam Gillis, and Yecko Lilya.

The awards to the seniors were made by Dr. R. P. Borden, who spoke on the work of the Association, and of its value to the people at large. Since he had become acquainted with the work of the Association, and the splendid results achieved by the local teams, he felt the highest admiration for those who from an unselfish motive and with a desire to render service in its true sense to their fellow men, give their time and energy to the work of the St. John Ambulance Association. It was characteristic of British ideals that they should engage in this work, not for the applause of the crowd, because their work was carried on not with any expectancy of applause or reward, but for a sheer love of the work and a sense of duty in its highest form. They had learned the real lesson of life.

If he got nothing more out of Coleman than the satisfaction and pleasure of having been associated with men and boys in these classes,

he would feel it had been well worth while.

He then presented the following with their awards: W. H. Garner, medalion, for third year work; and the following for second year: Blyth Davidson, Adolph Cornes, Nelson Fleming, H. Wilton Clark. The last three were not present to receive their awards.

Badges were also presented to medalion holders, men who have qualified in the third year work of the Association: D. C. Robert, G. S. Greenhalgh, Joe Kapalka, R. M. Greenhalgh, J. Glendenning, W. Kerr, A. J. Brown, J. D'Andrea, D. Davidson, James Kerr, R. Morris, G. Duffield, A. McCulloch, J. Rushton, W. H. Garner, Thomas Izatt (Mercoal), D. Davis and E. Hill.

D. Gillespie and W. Lees, representing the Miners Union, were present, the latter speaking briefly on the value of the work and especially praising the boys for the active interest they had taken and the results achieved. He stated that it was a reason for pride to see the manner in which the boys could render first aid and reflected credit on themselves and their instructor, and all those engaged in the work deserved their heartfelt thanks. He felt confident there would be no difficulty in financing the local branch, as its services were fully appreciated.

In the closing address by D. Davidson, he stated that efforts were being made to secure financial aid in the work from the provincial government. British Columbia made substantial grants whereby men were paid their expenses and their wages during the time they were absent from employment engaged in first aid work or competitions, in order to encourage the work, and the local association had been promised by Premier Brownie that when he came to the Crow's Nest Pass, he would go thoroughly into the matter.

The evening closed with the singing of the national anthem.

Intense Interest Shown In Prize Fight

The ring side broadcasting of the championship prize fight last Thursday night gave those listening as much of a thrill as those who were sitting in the huge stadium at Soldiers Field, Chicago, for many of them would be so far away they would not be able to discern the details of the fight, whereas the broadcasting gave every move of the fighters. Though there were plenty of noises of all kinds in the air, the voice of the broadcaster "out noised" them all. The cheers of the crowd were distinctly heard as the rivals entered the ring, besides the ring of the song denoting the finish of each round. An exceptionally good reception was received over the radio at Geo. Patinson's residence, where the radio expert of the Ashdown Hardware Co. was demonstrating the same loud speaker that was used on the Prince of Wales ranch on his recent visit.

Boy Scouts

Local association will meet in the Anglican Parish Hall on Monday evening at 8 o'clock.

RED ROSE TEA

RED ROSE ORANGE PEKOE is the "best tea you can buy"—picked when only three days old—juicy, flavor-filled leaves. Now packed in Aluminum.

General Outlook Is Encouraging

The latest preliminary estimate of the yields of the principal grain crops, issued by the Canadian Government Bureau of Statistics, based upon reports from all parts of the Dominion, predicts a wheat crop of 45,411,000 bushels for this year, the second largest ever grown in Canada. The record crop was in 1923, which totalled 47,159,000 bushels. This year's wheat crop is estimated at 45,450,000 bushels more than last year's yield and promises an average yield per acre of 20.4 bushels per acre.

The three great grain growing provinces of Canada, Manitoba, Saskatchewan and Alberta, will produce 132,227,000 bushels of this year's total crop of wheat as compared with 128,210,000 bushels in 1926.

There has been considerable damage from rust this year in various sections of Saskatchewan and Manitoba, and when final threshing returns are in, the government's estimate may be considerably lowered. The Manitoba Free Press estimates the wheat crop of the three prairie provinces for the year 1927 at 42,131,215, which is some eight million bushels less than the government estimate. This paper's estimate is also considerably lower than that of the government and in the final analysis may prove to be more nearly correct, as with the exception of Alberta and the western part of Saskatchewan, the crop has been rather disappointing. Rust and frost have caused a lot of damage, however, there can be no question but that this year's crop throughout the west will be well above average.

A new high record of wheat production has been established in Alberta this season with a crop now estimated at 168,862,000 bushels, an increase of 24,028,000 bushels over the previous bumper crop grown in 1923. But not only wheat promises a bumper yield this year; oats, barley, rye and other grains as well as the whole crop of field and orchard crops promises record returns. The 1927 crop of 15,524,000 tons of hay and clover from 10,157,836 acres is the largest yield ever recorded in Canada.

The yield of oats has also been good with an estimated production of 62,159,000 bushels, of which 332,201,000 bushels were produced in the Prairie Provinces. Particularly good crops are being harvested in Saskatchewan and Alberta, and the estimate for the Prairie Provinces is the second largest shown. In 1923 it was estimated that 291,756,000 bushels were harvested in Western Canada. The 1927 production of barley is expected to be 59,000,000 bushels, and 17,142,000 bushels.

Though good weather is still required for the completion of threshing operations, there have now advanced so far that over a considerable area threshing is finished. There is naturally a feeling of optimism among Canadian farmers and business men. Not for years has the general outlook been so encouraging in Canada as it is at present.

Japanese Royalty Engaged

Help To Japanese Throne Is Betrothed

To Daughter Of Prince
Prince Chichibu, 25, brother of the Japanese Emperor, and next in line to the throne, is reported betrothed to Mahoko Ichijo, 17 year old daughter of Prince Ichijo, says a Tokyo despatch to the Evening News.

Prince Ichijo is chief minister of the Imperial Court and a member of the ancient Kinto nobility.

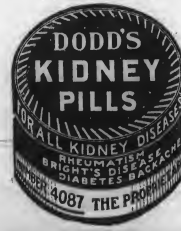

The despatch says that an early engagement of the Prince is urged by court dignitaries and the lack of a son in the emperor's family is feared to make the early marriage of Prince Chichibu desirable.

When Asthma Comes do not despair. Turn at once to the effective Dr. J. B. Kellie's Asthma Remedy. This wonderful remedy will give you the relief you need. Coughing, choking, wheezing, becomes natural and without effort. Others, thousands of them, have suffered so you suffer but have wisely turned to this famous remedy and ceased to suffer. Get a package of this very day.

Lignite Utilization Board

Plant At Brierfield, Saskatchewan To Be Remodeled

Official announcement has been made by the minister in charge of the Bureau of Industries of the Government of Saskatchewan that the plant of the Lignite Utilization Board at Brierfield, Sask., has been acquired by the organized western Dominion Collieries Company of Winnipeg, which company will remodel the plant for commercial operation at an earlier possible date. Negotiations leading to this end have been carried on for some years following the experiments by the board from 1919 to 1923.

W. N. U. 1709

Some Highways Over-Signed

Directions Necessary Only Where Road Is Doubtful Or Dangerous
"Signing the highways" has long been a topic for departmental consideration. Some have done little, others a good job, and some have "over-signed" their highways.

We read in newspapers of patients who take an overdose of doctor's medicine and die. The motorist in some localities are in the same position—overdoses of "signs" cause near death to many good trips, and travelling is "hard work."

Whoever is in charge of signs in a highway department should study the situation carefully, and erect signs at every place where the motorist can go wrong or is in danger. No other directions are necessary. The sign correctly placed is better than ten signs placed "chirp naps."

This Wonder Liquid Dissolves Corns Quickly

Makes them shrivel up, makes them drop off, makes your toes feel like a day or two. Healed in instantaneous time on a few drops of Putnam's Corn Extractor tonight—see how well your sure corns feel in the morning. It's a wonder liquid—a marvel work. Nothing so good for corns as Putnam's Corn Extractor. Get Putnam's from your druggist—today. Satisfaction guaranteed.

Ship Hens For Egg Contest

First Canadian Entry Left Vancouver Recently For England

The first Canadian entry to the International egg laying contest, which will open at Preston, Lancashire, England, shortly, left Vancouver in a specially equipped express car over the Canadian National Railway.

The shipment was made up of thirteen white Leghorns from the pens of Farrington Brothers, Burnaby, under the supervision of Prof. E. A. Lloyd, of the University of British Columbia.

During the long journey sufficient British Columbia apples were being carried to furnish each bird with one daily.

FOR MOTHERS OF

YOUNG CHILDREN

Mother's are quick to prize anything which brings health and content to their little ones—any medicine that will make them happy and keep them well will always receive hearty recommendation from mothers.

That is why Baby's Own Tablets are so popular. Thousands of mothers, throughout the country, only use them for their own little ones but are always delighted to be able to recommend them to other mothers. Thousands of mothers have proved Baby's Own Tablets to be without an equal in relieving their little ones of any of the many ailments which arise out of a derangement of the stomach and bowels. Baby's Own Tablets are the ideal laxative—easy to take but thorough in action. They banish constipation and indigestion, break up colds and simple fevers; expel worms and ease the terrible period of teething. The Tablets are sold by medicine dealers or by mail from 25 cents per box from Dr. Williams' Medicine Co., Brockville, Ont.

It is permissible to blow your own trumpet only if you are a member of a brass band.

A man doesn't realize how small the world is until he tries to dodge his creditors.

Does Weakness Detract From Your Good Looks?

Photo by McKinnon
Mrs. Thomas Chapman of 3 Somerset Place, Toronto, Ont., whose picture appears here, said: "Dr. Pierce's Favorite Prescription was very helpful to me and I know it to be the very best medicine a woman can take when nervous and run down. I had a break-down my nerves were so upset I could not sleep. I suffered from nervous indigestion, but after taking Dr. Pierce's Favorite Prescription I did not suffer with indigestion and I could get a natural night's rest, which I could not get before. I am now as vigorous and healthy as ever. I would recommend the Favorite Prescription to all women." All druggists, Tablets or Liquid. Write Dr. Pierce, Free Medical Hotel, Buffalo, N. Y., for free address.

Money From the Clouds

Mayor Foster, of Toronto, while taking an airplane trip over the city, dropped ten marked one dollar bills which he will redeem for \$5,000 returned to him at the city hall. This is being done to add interest to the flight which he is making in order to become a member of the Aeronautical Association, which began its convention in the city.

Saskatchewan Furs

The total estimated amount of animal pelts trapped in Saskatchewan for the many kinds of fur they brought in in 1926 is \$1,566,706. The number of furs brought in was 650,742—the greatest being muskrat number 455,558 with a value of \$590,225, and the next moose with 34,515 pelts worth \$274,376.

Minard's Liniment for Asthma.

Why Suffer from HEMORRHOIDS? (Piles)

Quick and positive relief is available through the use of Anusol Suppositories.

Your physician will tell you that there is no safer or better non-surgical treatment of Piles than the use of Anusol. It is the leading effect of these remedial Suppositories.

Half a century of success in the treatment of Piles has made Anusol your assurance of good results. Ask your doctor or write for free literature, postpaid, \$1.00. Canadian & Foreign Dispensary Company, 1115 Building, Montreal.

ANUSOL SUPPOSITORIES

Is Efficient Store-Keeper

Blind Man At Salt Lake Expert In Distinguishing Coins

Charles A. Larson has been blind for 16 years, but he conducts his grocery store at the Salt Lake tourist park as efficiently as though his sight was unimpaired. His wife and two daughters assist at times, but he is not dependent upon them. Every commodity is put in a designated place and Larson is able to walk to any part of the store, select the article wanted by the customer, and return to the counter. He is an expert in distinguishing coins and has no difficulty in making change. Scores of tourists have bought supplies from him without learning of his affliction.

A Corrector of Pulmonary Troubles.
Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory passages, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will ally inflammation in the bronchial tubes.

Cattle Must Be Tested

New Ruling For Exhibits At Royal Winter Fair

All cattle exhibited at the coming Royal Winter Fair must have passed a satisfactory tuberculin test conducted by a veterinary inspector of the Health of Animals Branch Department of Agriculture, is one of the conditions laid down in the regulations, which have just been issued. This test must have been made within sixty days prior to November 15th, the opening date of the fair, unless the calf came from a fully accredited herd or a herd under process of accreditation, in which event they will be accepted without a special test.

All cattle that require the test shall be submitted to a tuberculin test by a veterinary inspector, free of charge, as soon as possible after entry has been received. A list of exhibitors and their cattle will be supplied to the veterinary director general as soon as possible after they have been received.

It will be an advantage for exhibitors to therefore forward their entries as early as a date as possible previous to October 27th, the final date upon which entries will be accepted. The veterinary director general will report any entries to the association, and the association will then report to the owner the entry fee on such animals.

Cattle from the United States will be accepted by the association upon the tuberculin test chart, which permitted their entry into Canada.

A Praiseworthy Hobby

Giving away flowers to the sick has been the hobby of a man or woman, South Carolina, for the past twenty years. He estimates he has given 80,000 bouquets to the sick. Now a man of sixty-six years he spends early morning and evening in his flower garden. Each Sunday he picks the flowers in bloom and makes his weekly round of Greenville hospitals and sick beds.

Alfalfa Meal Mill

Edmonton, interests are looking to the possibility of establishing an alfalfa meal mill at Leithbridge, for the grinding of alfalfa and the making of milk feeds with ground alfalfa and sugar by-products from the Raymond sugar factory as a basis. The extensive acreage of alfalfa in the irrigation districts about Leithbridge has roused this interest.

Paris Gendarme (to Incubated Mothers): "Give me your address, I will take you home."

American Tourist: "225, Third Avenue, Chicago."

The first recorded instance of vessels paying tolls occurred at the St. Lawrence, in 1160. Toll boats were in use in England in 1267.

The Terror Of Thirst

Nothing Else Holds As Much Fear For Explorers

Thirst is the greatest terror of the explorer. In Central Asia is the Golden Water, a vast uncharted, waterless region, devoid of trees, plants, or any living thing. Only one man has ever penetrated it.

That was Sven Hedin, the Swedish explorer, who made a "dash" from one end of the desert to the other. He accomplished the feat after losing all his camels and baggage, and nearly his own life as well.

During last year over two hundred expeditions set out from this country and the United States to explore our unknown world. Yet so well does Nature guard her secrets that it will be many years before we can say that we know all there is to be known about the earth on which we live.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. Their symptoms are easily recognizable in a feverish restlessness, frequently ending in convulsions. A painless and perfect remedy for children is always on hand in a very healthy condition.

Descendant Or Ancestor

Easier To Be Former Than Latter

Theodore Roosevelt once said, "It's so much easier to be a descendant than an ancestor." Perhaps no one knows this better than does the man who is always talking about what his ancestors have done, yet is all the while doing nothing noteworthy himself. It is never easy to do something great or useful or helpful. It is a great deal easier to talk about others who have done great things. We need to remember that while we have a right to be proud of what our ancestors have done we have no right to stop with pride. If we would do our whole duty to the world we must make it possible for our children to be proud of their ancestors also.

Woman Makes Colored Steel

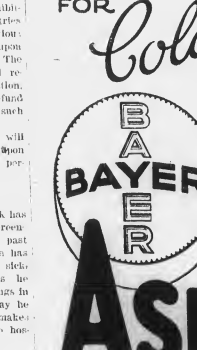

By a secret process, recently perfected by Miss C. Giff, of Illinois, England, steel may be colored for use in ornaments and fittings to be used for buckles and buttons. The colored steel is said to be sturdier and stronger, may be an indicator of heat, and the color can be applied in artistic design.

Many have been deceived of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

Manitoba Bait Binder Twine

Five hundred acres of hemp are under cultivation within a radius of five miles of the plant of the Manitoba Cordage Company at Portage la Prairie. This year the company has been experimenting with binder twine and, according to report, certain farmers have been supplied with a number of bales of twine, to report on its quality after use.

FOR Colds

DOES NOT AFFECT THE HEART

Safe

Aspirin is the trade mark registered in Canada of Bayer Manufacturing of Monroville, Pa. and is the only name of Bayer's Aspirin. It is not to be confused with the name of Bayer's Aspirin which will be stamped with their trade mark, the "Bayer Cross."

Seeking Ship For Commander Byrd
Arriving at New York, Lieut. Dorset, of the Command, Rich and E. Byrd's trans-Atlantic crew, answered as follows to an inquiry as to the purpose of his visit: "Commander Byrd asked me to come to New York and find a ship which he intended to send to the Ross barrier this winter for reconnaissance before he starts the great antarctic expedition next year. In addition to the ship my task also is to find equipment and men, especially skiers, who are ready to leave for the Antarctic this autumn."

DYSENTERY WAS SO BAD BECAME ALARMED

Mrs. Wallace Pepper, R.R. No. 6, Simcoe, Ont., writes: "Last summer I was very bad with dysentery. I lost my appetite and had such severe pains in my abdomen they made me very nervous. I passed blood which greatly alarmed me, so I hurried to the doctor. He told me the quickest way to get rid of it would be to take

"I took only part of a bottle and was completely relieved. I feel I cannot recommend it too highly."

This wonderful bowel complaint remedy has been on the market for the past 80 years; put only by The T. Milburn Co., Limited, Toronto, Ont.

The fastest moving living creature is the deer or but fly of North America and therefore, biologists say it can fly at the rate of 185 miles an hour.

Relieves Sore Throat—Minard's Liniment.

If you would retain a man's friendship don't try to show him that he isn't half as smart as he thinks he is.

It's an easy matter to get around any one you can see through.

SHOULD USE MORE BRITISH MADE GOODS IN CANADA

Ottawa.—An annual angle on Canada's imports from the United States was explained by Hon. James Macdonald, minister of trade and commerce, speaking at the annual banquet of the Bread and Cakes Bakers' Association of Canada here. Mr. Macdonald pointed out that goods valued at many millions, imported from the United States were in reality British imports.

The most striking example of this was the \$26,000,000 worth of rubber for automobile tires that came to Canada through the United States, and appeared in the trade balance as U.S. imports. As all raw rubber came from British possessions (Canada's imports of this commodity from the U.S. were constituted a British import) via the U.S. owing to the great quantities used there it could be imported more cheaply, the trade minister said.

Up to the present time fruits from the West Indies came under the most favorable tariff, however, the Canadian government had established direct trade lines with the West Indies and it was hoped that in future fruit for consumption here would arrive through Canadian ports.

Mr. Macdonald's address was a plea for the greater use of British made goods in Canada.

Speaking on immigration matters Mr. Macdonald asked if it was not a wiser policy to continue a sane method of selective immigration from the old country and northern Europe rather than flood the land with undesirable to the detriment of native sons and daughters.

The speaker thought Canadian bakers had a record to be proud of. During the war Canada enjoyed the cheapest bread in the world and there had been no profiteering among the bakers, he said.

League May Meet In Ottawa

Canada Planning To Invite Council To Meet Here.

Ottawa.—Canada, recently elected to a non-permanent seat on the council of the League of Nations, is reported to be planning to invite the council to sit at Ottawa. In fact there is a projected scheme to have the whole League assembly meet there in order to give American news papermen and League sympathizers a ready occasion to study its workings at first hand. This project is still in abeyance. It seems certain that one of the council's meetings in the near future will be held in Delhi.

The Maharajah of Kapurthala, one of the chief representatives of the world, would like to see a session of the League council held in Delhi, India's capital, at some not too distant date.

Speaking to a correspondent to day, he asserted the governing classes in India are doing all possible to interest their people in the aims and aspirations of the League.

Defeat Of Dempsey

Gene Tunney Retains Heavyweight Championship Of The World

Chicago.—Gene Tunney proved himself worthy of the heavyweight championship of the world by decisively defeating Jack Dempsey in the second ten round bout they had fought for the title.

The battle, the greatest ring spectacle ever witnessed, was fought before a record crowd of nearly 150,000 persons, with receipts totalling \$2,800,000, the largest in recorded history. The champion in 35 minutes earned \$1,000,000 and the defeated challenger \$450,000 for his come back try. These magnificent figures have eclipsed by far previous records.

Rejoiced to the dust of the canvas by a terrific left hook in the seventh round, Gene gallantly got up and came back to whip his dangerous opponent.

Bleeding and bruised, Jack Dempsey reached the end of his career in the ring when he could not follow up that one terrific blow which had the champion on the floor.

Study Einstein's Theory

Geneva.—Two Belgian scientists, F. Peierls and Dr. Stiebel, have launched a physics laboratory on the summit of Right-Kulm, 5,905 feet above Leuven. Their object, especially, is to make a study of Einstein's theory of relativity. Mathematics and English scientists are invited. It was said to visit the new laboratory.

W. N. U. 1700

Freight Rates Case

Reasons For Freight Out Are Given By Board

Ottawa.—Reasons for judgment in the general freight rates case were made public by the Board of Railway Commissioners. The judgment itself was handed down on August 25 following an extensive investigation of railway freight rates throughout the Dominion. The judgment provided more or less extensive reductions in rates on grain and other commodities for export.

The reasons issued recently cover 200 pages and review in detail the hearings in the different parts of Canada, together with the conclusions arrived at by each of the commissioners. In the main, Chief Commissioner H. A. McKowen, Assistant Chief Commissioner McLean, and Commissioners Viohn, Joyce and Lawrence are in agreement on the main points involved in the August judgment, namely: Transcontinental rate scale; terminal tariffs; different standard mileages, East and West; and domestic grain rates to British Columbia. Chief Commissioner Oliver submits a number of conclusions differing somewhat from those of other members on the board. A schedule dealing with the West Indies case under the same heading. Now, however, the Canadian government had established direct trade lines with the West Indies and it was hoped that in future fruit for consumption here would arrive through Canadian ports.

Impressed With Canada

Grandson Of Famous "Iron Chancellor" Paying Visit To Dominion

Ottawa.—Count Gottfried Von Bismarck, a tall, blond, good-looking young German, whose grandfather, Prince Otto Eduard Leopold Von Bismarck, was the famous "Iron Chancellor," arrived in Ottawa from Chicago to spend next few days in the capital. Count Bismarck is interested particularly in agriculture and he visited the Dominion Experimental farm here.

The young count has been somewhat impressed with the country since from Winnipeg he visited the Manitoba wheat fields. He said he had been greatly interested in the operations of the Canadian wheat pools and the Winnipeg Grain Exchange. He was impressed also with the extent to which machinery is used on the western farms—far more, he said, than in Germany, where farms were smaller and labor less expensive.

Silk Train Wrecked

Valuable Cargo Tumbles Down Embankment With Train Leaves Rails

Vancouver.—A silk train valued at \$250,000 was lying in the street here on the bank of the Fraser River, east of here, as the result of the wreck of a Canadian Pacific Railway special silk train travelling east. The train, consisting of 18 cars destroyed telegraphic communication along the Canadian Pacific Railway when ten cars lurched down the bank.

Five cars tumbled into the turbulent waters of the Fraser River, while the five others were arrested in their fall by rocks and trees.

Canada's Auto Production

August Increase Fifteen Per Cent. Over July Output

Ottawa.—Production of automobiles in Canada during August totalled 12,536 cars, an increase of 15 per cent. over the output of 10,887 units in July, which was the lowest month this year, but 18 per cent. under the 15,261 cars reported for August of a year ago.

Production in August of this year included 2,485 open passenger cars, 7,003 closed passenger cars, 2,322 trucks and 716 chassis. Of the 716 chassis, 651 were intended for passenger cars, 12 for trucks, and 53 for either passenger or freight service.

Suspend Code Sub-Section

Regina.—That sub-section of the criminal code which forbids an alien to be in possession of a shot gun, rifle or ammunition is to be suspended in so far as it relates to the Northwest territories the Gazette notified. The suspension is brought about by representatives of the RCMP, that to prohibit and weapons would be in the hands of the people of the Northwest territories the Gazette notified. The suspension is brought about by representatives of the RCMP, that to prohibit and weapons would be in the hands of the people of the Northwest territories the Gazette notified.

Receive Higher Wages

Berlin.—Two leading labor leaders, Germany, is considering paying bachelor employees of the government more than the married men. At a conference in the foreign office regarding a nation-wide increase in wages, the minority report asked higher wages for bachelors because living is more expensive for them, as they have no wives to cook for them and spend much more on amusements.

Protest Tariff Change

Manufacturers Of Cutters and Buggies Object To Reduction In Duty

Ottawa.—Manufacturers of buggies and cutters protested to the tariff board against the application of the Consumers' League for a reduction of the duty on these articles. The manufacturers asked that the present duty be retained and that the sales tax be removed. This would save the purchaser \$1 to \$5 on buggies and \$1.50 to \$3 on cutters. Approximately 3,200 buggies were sold in Canada every year, it was stated.

H. J. Beauchamp, of the Consumers' League, argued that the existing tariff was more than enough to protect the industry. A buggy that cost \$95 in the United States cost \$109 in Canada. The Canadian industry, he said, had a pretty full measure of protection.

U.S. Ambassador To Mexico

Washington.—Dwight W. Morrow, the New York banker, has been selected by President Coolidge to be ambassador to Mexico. The Washington Government has obtained the Mexican Government's sanction of the selection. The post has been vacant since Ambassador Sheffield resigned last July.

COSGRAVE MAY CARRY ON FOR ANOTHER YEAR

Dublin. President Cosgrave's

Free State government, despite the disappointing outcome of the parliamentary elections, intends to carry on with the expectation of at least a year of life. In making this announcement, Hon. Ernest Blythe, vice-president of the council, stated that a new loan will be floated in December.

The ministers, all of whom were re-elected, are confident it may be taken from this, that when the new parliament convenes October 11, it will approve the continuance of Mr. Cosgrave as president of the council and that he will accept the mandate.

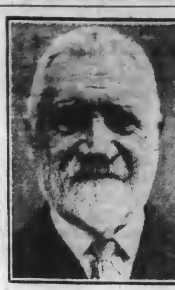

There is no doubt, observers say, that such an outcome would meet with the wishes of the business community throughout the Free State, regardless of political affiliations.

It is realized, however, that the administration will have to go quickly and that its success will depend upon how far it is able to carry out its policy. It is one of the leading groups in the Dail. Although the farmers, with six deputies, and the independents with twelve, are commonly ranked as government supporters in the Dail, their attitude is one of solid abstention.

In fact, P. E. Devlin, leader of the Farmers' Party, who lost his seat in the election, is quoted as saying at Cavan recently that as President Cosgrave had not received a definite mandate from the country the alternative was to make way for the Fanna Fall and give Eamon de Valera a chance to prove his policy practicable.

There is a suggestion that Mr. Cosgrave may offer a government portfolio to a member of the Farmers' Party and that in this case the party would vote solidly for him.

Will Attend Convention

Acton, Hants, Toronto, Ontario, will be an interesting delegate at the Dominion Conservative party convention in Winnipeg. He was one of the secretaries at the Conservative convention in 1918—nearly half a century ago—when Sir John A. Macdonald's famous national policy was launched and he has the original of the resolution that was passed on that historic occasion.

To Aid In Defence

New Zealand To Help Pay Expenses Of Singapore Naval Base

Wellington, N.Z.—Premier Coates introduced in the House of Representatives the government's naval defence proposals, of which the chief feature is a contribution by New Zealand to the Singapore naval base.

The premier said that the proposals would bring New Zealand's expenditure on naval defence up to ten shillings (about \$2.00) per capita.

No affront to Japan was contemplated in any way by the construction of the Singapore base, he said, adding that Japan's action in the great war had been unforgettable, especially the visit of Japanese warships to New Zealand waters to assist in the conveying of troops.

Considering the long trade routes to be defended by Great Britain, Premier Coates said, New Zealand was entitled to shoulder a fair share of the imperial budget.

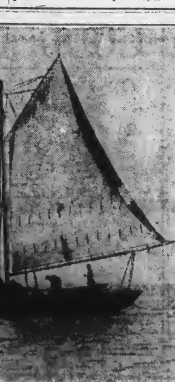

The proposals were adopted by the house 51 to 10.

Wheat Pool and Prices

Pool Will Not Be Used To Boost Price To The Consumer

Ottawa.—There was no cause for alarm or reason to expect that the farmers would use the wheat pool to boost the price of wheat, Hon. W. R. Brewster, federal minister of agriculture, told the convention of the Bread and Cakes Bakers' Association in session here. Hon. Mr. Brewster spoke on "Co-operation" and said the wheat pool was by far the best measure which had ever been taken by the farmers for their own prosperity and consequently for that of the entire country.

It would be virtually impossible, he said, for Canadian farmers to hold wheat for any length of time with a view to raising the price. Outside competition was too great from the point of view of exporters, he said.

Baldwin Sees Whaler in Action

Premier Baldwin's bird's eye view of the phases of Canadian whaling activity was obtained as the Canadian Pacific steamer of Scotland steamed out of the harbor of North Sydney recently to receive the Premier's homeward-bound tour.

When only a short way out a seventy-five year old whaler seen above crossed the bows of the huge liner for the purpose of demonstrating to the Premier just how their operations are carried out. The photograph shows the old whaler off the starboard side of the liner. One observer perched on top of the mast as the lookout while the harpooners were seen on the sail in front with the harpoon in hand.

The Burgess of Scotland, bearing the helmsman of the British steamer home to England from his Canadian tour, was the largest ocean vessel ever to enter the harbor of North Sydney.

Three-Motor Plane Ready For Flight

Will Leave North Sea Island On Trans-Atlantic Trip

Berlin.—Despite vigorous denials by directors of the Junkers Aeroplane Works, it was learned from an unquestionable source that the G-24, a three-motor plane, has been made ready at Malmo, Sweden, for a trans-Atlantic flight and may arrive at any time at Nordenskiöld. The North Sea island which was a German airplane base during the war.

The plane, it was learned, will be piloted by Friedrich Loss, one of the Bremen's pilots on the recent unsuccessful Junkers run across the Atlantic.

The flight is planned to proceed in stages by way of Lisbon and the Azores, and then probably to Bermuda, although it is possible that the route may be to Newfoundland.

It was said that a type of their G-24 machine was ready for a trans-Atlantic flight to the United States, but in view of the fact that the Junkers Corporation had nothing to do with the project.

They stated that they had merely sold the plane some time ago to a north German undertaking.

Mission School Tragedy

Grey Nuns Sister and Nineteen Children Perish in Flames

Big River.—Death and destruction today stalked in the frontier outpost of civilization at Beauval, a hamlet 150 miles north of Beauval.

There the bodies of 19 children, ranging in age from six to twelve and that of a woman lie waiting for a coroner's investigation. All were victims of a midnight blaze that swept the mission school mission.

From the wreckage details the fire swept the three-story frame building with such rapidity that in three or four minutes the entire structure, thick with smoke, had been reduced to a heap of ruins.

The victims are 15 pupils of the school and Sister Lea in charge of the Convent where the fire was first discovered. In addition, a priest was badly burned in the rescue work that he is not expected to live.

Forty-six children were saved from the inferno.

The fire is believed to have started in the furniture of the building close to the furnace, and spread toward the boys' dormitory.

The fire is believed to have started in the furniture of the building close to the furnace, and spread toward the boys' dormitory.

SOVIETS CAUSE STRONG PROTEST FROM FRANCE

Paris.—The storm which has been brewing over the head of Christian Rakovsky, Soviet ambassador to France, has burst at last. Le Matin said that France has officially informed the Moscow government that Rakovsky's recall is an indispensable condition to any negotiations for a non-aggression pact with the Soviets.

Furthermore, the French ambassador, M. Herbelot, was instructed to say the Soviets must give practical proof of their intention to live up to both in spirit and in letter, to the Russian understanding, entered into in 1924, to abstain from all interference with France's internal affairs, by ordering their agents and those of the third or communist international, to cease activities in France.

In addition, France requires that the Soviets take active steps to bring to a conclusion the long drawn negotiations for settlement of Russia's debts to France.

Only when these conditions have been completely fulfilled, Mr. Herbelot was instructed to say, will France consent to open negotiations for the treaty of non-aggression recently proposed by the Soviet government.

The latest Franco-Russian crisis, thus brought to a head, began when Ambassador Rakovsky signed, as a member of a Russian communist party committee, a manifesto urging the soldiers of all nations to march and overthrow the Bourgeois governments.

This raised a storm of protest in France and repeated representations were made to Moscow. Foreign Minister Tschitcherine, of the Soviet Government, at first disapproved, and then formally disavowed M. Rakovsky's action, but took no steps to recall him.

Instead, Tschitcherine offered to enter into a treaty of non-aggression and non-interference in internal affairs.

For students of languages who desire to study abroad this year courses are available in 60 educational centres on the Continent, according to the British Board of Education.

WOULD LOCATE ALL DOCKHOBORS IN ONE COLONY

Winnipeg.—A plan which has as its ultimate goal the concentration of all Dockhobors in a single colony in Western Canada, was disclosed by Peter Vergein, the younger leader of the sect and spiritual head of the Community of Universal Brotherhood, on his arrival here.

Mr. Vergein was accompanied by Paul J. Hruskoff, Poland, whom he had invited to visit the colony in Canada, in connection with educational and cultural work.

Speaking through an interpreter, Mr. Vergein declared he was still ignorant of conditions prevailing among the Dockhobors in the Dominion, but stated that he was "anxious to meet his people."

A brief stop was made in Ottawa where Mr. Vergein conferred with Hon. C. A. Dunning, Minister of Railways and Canals, and Hon. Robert Porter, Minister of Immigration.

Mr. Vergein intimated he was most anxious that the Dockhobors should have the best educational advantages without relinquishing any religious tenets. He was in possession of this plan, he invited Mr. Hruskoff to visit Canada, hoping through the latter's knowledge of modern education to evolve some plan of harmonizing the old customs, habits and ideas now extant. Their education, he asserted, should be based on Dockhobor religious beliefs, as in keeping with the objective of the sect should be largely a religious one.

"We are willing that the Government use our brains and our energies, but not our souls," he declared.

Asked what he thought of recent charges that the Dockhobors colony was a purely Communist, Mr. Vergein said:

"It is Communism in a sense, but it is peaceful Communism, a positive Communism, based on religion. It is a Communism for all humanity, a true brotherhood."

A question as to the wheat pool system of the West and the brotherhood's attitude towards it brought out the statement that the Dockhobors already have a system similar to that of the pool, with their own elevators and marketing system. There was no need as yet, Mr. Vergein stated, to consider joining the western wheat pool.

Following his visit to the colonies in Canada the Dockhobor leader said he intended to approach the federal government with further plans for the settlement of the Russian colony in the West.

There are approximately 15,000 Dockhobors in the Dominion, while more than that number are now in Russia.

Amazing Development In Banking Business

England Opens New Bank Every Week Day

London.—Every week day in England a new bank is opened for business.

That is a plain statement of the amazing development in banking which is now taking place in this country under the direction of the "Big Five," the five great joint stock banking corporations.

There is no parallel in the world to the immense growth of the English banks during recent years. Their financial power is beyond calculation.

Bank deposits during the past twenty years have multiplied from £247,800,000 to the enormous figure of £1,448,174,000 or more than 245 per cent. for the population of the British Isles.

Pione To Carry Sixty Passengers

Paris.—Charles A. Levine is planning to return to the United States on October 11 with three French engineers, with the intention of building a huge airplane capable of carrying sixty passengers across the Atlantic in regular flights, one of his closest advisers stated here. No further details of this project could be obtained.

Failed By Few Miles

Montreal.—A. Meredith Jackson landed here recently after having been almost lost far out at sea in a 26-foot sloop with Dr. Stedman. They nearly made a trans-Atlantic trip in this small craft, and were picked up 30 miles off Newfoundland. They were then taken to a small boat in which they reached here.

THE COLEMAN JOURNAL

2ND AVE., E., COLEMAN, ALBERTA. H. T. Halliwell, Editor and Publisher
THURSDAY, SEPTEMBER 29, 1927

Alberta "On Top of the World"

To those whose feelings may be tinged with a touch of
pessimism, the following editorial from the Edmonton Bul-
letin should do much to dispel such feelings, and bring home
the fact that there is cause for a great deal of optimism:

"This is Canada's big year! It is Alberta's greatest
year! 'You tell 'em, Alberta! You're sitting on Top
of the World!'" Canada is harvesting the second largest
wheat crop in its history—458,741,000 bushels, according to
the estimate recently published by the Dominion bureau of
statistics.

Alberta has broken its own greatest record, with an est-
imated crop of 168,862,000 bushels of wheat. A later
estimate, made by crop experts of the Winnipeg Free Press,
places the figures even higher—175,028,000 bushels.

You tell 'em, Alberta. You're "Sitting on Top of
the World!"

Whichever of these two estimates proves to be the most
nearly correct, one fact stands out clearly—that Canada is
harvesting its second largest wheat crop, that Alberta alone
is responsible for over one-third of this, and that Alberta has
the greatest crop in its history.

And it is not alone in its agricultural production, that
Canada today, as testified to by the Dominion's most prom-
inent leaders from Governor-General Lord Willingdon down,
has its feet planted firmly on the ladder of prosperity.

From the great factories of the east come stories of de-
velopment and progress, keeping pace with Canada's era of
prosperity. The forest, the mine and the sea are all con-
tributing their meed to the general tale of prosperity.

In Alberta, in addition to a wheat crop the greatest in
its history, and to corresponding development along other
agricultural lines, there is evidenced the growth of an era of
prosperity for the development of its natural resources.

Alberta's coal, oil, tar sands, timber, fisheries—all these
are adding materially to Alberta's prosperity.

Truly, today, Alberta is "Sitting on Top of the World."

A Trait of Human Nature

The heavy-weight championship of the world fight be-
tween Tunney and Dempsey excited just as much interest
here as in other parts of the world, and has formed a topic of
conversation on the streets for many since, which goes to
prove that after all everybody is keenly interested in getting
a thrill, no matter whom the contest may be between.

Since the Creation down to the present day, man has
been possessed of combative instinct, and all the education
and culture that might be applied will not eradicate it.
It was planted there in the first man, and there it will re-
main, despite all the moralizing of man being little better
to-day than the cave man of centuries ago. The combat
goes on every day, though not in perhaps as savage a man-
ner as to fight each other or go around seeking the blood of
our enemies with a club. The old law of the survival of
the fittest is seen in every phase of human activity, and he
who imagines he can change it is wiser indeed than the
Divine.

That Settles The Matter Of What

The New FORD Will Be Like

Absolute knowledge have I none
But my aunt's washerwoman's son.
Heard a policeman on his beat
Say to a laborer on the street,
That he had a letter last week
Hand written in the finest Greek
From a Chinese coolie in Timbuctoo
Who said that a son in Cuba knew
Of a colored gent in a Texas town
Who got it right from a circus clown
That a man in Klondike got the news
From a gang of American Jews
About some fellow in Borneo
Who knew a man who claimed to know
A hermit who lived beside a lake
Whose mother-in-law will undertake
To prove that a friend's sister's niece
Has stated in a nicely written piece
That she has a son who knows about
The date the New Ford Car comes out,
BUT—
It will be a hummer when it comes out!
AND—It will be money in your
pocket to wait until it does come out.

IT WON'T BE LONG NOW!

Here and There

The late John Oliver, who came from England and commenced his Canadian career as a farm worker and later rose to be premier of British Columbia, left an estate valued at \$75,913.

The idea that the Scot will not spend money was dispelled this month so far as travel is concerned by the thousands of clansmen who came a hundred miles or more by train or motor to attend the Highland Gathering at Banff, Alberta, held in September.

A shipment of antelope from Canada to the United States is shortly to be made. Charles Blaser, rancher, at Lake Newell, who has for years interested himself in the preservation of these animals, has contracted to deliver twenty-two head to a Texas buyer.

It has been announced that the representatives of the Cuban potato buyers have agreed to take nine hundred thousand bushels of New Brunswick potatoes this season. Negotiations are at present under way with the Cuban buyers for the sale of the Nova Scotia potato crop.

Increasing interest has been shown in the organization of boys' and girls' swine clubs throughout the province of Alberta and new clubs have been formed, among other places, at Pincher Creek, Macleod and Raymond. To the winning team in Alberta the Canadian Pacific Railway awards a trip to the Royal Winter Fair at Toronto.

The 4,000 sportsmen who make returns to the Saskatchewan provincial gamekeepers department last year secured a total bag of 100,000 duck, 20,000 prairie chickens, 6,000 ruffed grouse, and 3,200 geese. In order to obtain some idea of the approximate bag of all hunters it is to be assumed that 12,000 who did not make returns secured the same average bags.

An unflinching indication of farm prosperity is the increasing sale of agricultural implements reported by nearly all dealers in the west this year. The demand for haying machinery has been especially heavy, while the sale of threshers, binders, combines and tractors has been exceptionally large, some firms reporting from 100 to 200 per cent. increases in the sales of these implements.

When the Canadian Pacific Railway train bearing 125 delegates to the Canadian Chamber of Commerce convention arrived at Craigellachie, B.C., recently, President S. B. Gundy requested that a brief stop be made during which the delegates paid tribute on the spot where the last spike of the Canadian Pacific transcontinental line was driven linking for the first time the East to the West. Mr. Gundy spoke briefly of the courage and vision of the builders of the railroad.

Alberta's potential coal wealth is greater than all the known coal deposits in the rest of the British Empire put together, according to Sir Thomas Holland, chairman of the Empire Mining and Metallurgical Council, recently at Calgary. If the present endeavors to change coal into a fluid fuel, capable of displacing petroleum and all its products, are successful, Canada will take the place of the United States as the world's provider of liquid fuel, he further stated.

No Canadian agricultural honor has come at a more propitious time than the award of the silver medal "for outstanding excellence" to the Canadian exhibit of tobacco prepared by the tobacco division of the Central Experimental Farm at Ottawa at the Tobacco Exhibition held at Olympia, London, England, in May. The Canadian product came into competition with that of South Africa, North and South Rhodesia, India, Colombia, Italy, Greece and Macedonia, thus consolidating the position previously held by Canada in expert opinion as the producer of the best tobacco in the British Empire.

Helpful Suggestions on Infantile Paralysis

Infantile Paralysis is a germ disease. It occurs most often in the summer months, and mostly among children, especially those under five years old. Following the advice given here will help your children escape this disease.

Infantile paralysis in its beginning resembles many other contagious diseases. A child that has been perfectly well becomes restless and drowsy. He is irritable and does not want to be moved. There may be vomiting or diarrhea, but constipation is the rule. There may be some headache or pains in the muscles. At times, a convulsion occurs. The child is feverish. That is all that appears, and yet within twenty-four to seventy-two hours, the child may not be able to move its arms or legs.

Do not wait for the paralysis. If the child appears to have fever, vomiting or marked restlessness, put him to bed and call a doctor promptly. No matter how mild the sickness may seem, get a doctor's advice. Do this to protect your child. While waiting for the doctor give the child a dose of castor oil. Keep all other children away until the doctor says there is no danger.

Every case of Infantile Paralysis should be reported immediately to the Department of Health. Follow the advice of your health officer who is working to protect your home from Infantile Paralysis and all other contagious diseases.

Constant Care of Children

Keep your children clean. Bathe them often. Make them wear their hands and face before eating. Do not let them use public roller towels.

Give each child his own handkerchief. Teach him to blow his nose and to cover the nose and mouth when he sneezes or coughs. Teach him to keep his fingers out of his nose and mouth.

Give each child his own toothbrush. See that he uses it morning and night. Keep the teeth clean and have the cavities filled.

Teach him never to use a cup or a glass that has been used by someone else.

Give the child plenty of water to drink. Forbid all tea and coffee. Food should be simple and easily digested. Give no fried foods.

Use clean, pasteurized milk, or milk from cows tested regularly for tuberculosis.

Put the children to bed early. Younger children should have a nap after lunch.

Be sure that the children's bowels are regular.

Do not use patent medicines. Bags of camphor or asafetida are useless. Beware of the dishonest advertisements of quacks who are interested in your money, but not in your children.

If Infantile Paralysis is Near

If there is an epidemic of Infantile Paralysis, keep your children away from crowds. Avoid the movies, theatres, parties, dances, picnics and crowded boats and trains. Keep your children away from homes where there is sickness. Infantile Paralysis is spread largely from one person to another.

If you have a yard, let your children play in it. The roofs of apartment houses are fine playgrounds, if no sick children are there.

Keep your house as clean as you can. Use plenty of soap and water. Burn up rubbish. Fight flies, roaches and other insects. Sinks must be free from the remains of food. Garbage buckets should be tightly covered and cleaned daily. Do not leave food uncovered between meals.

Fresh air and sunlight are nature's best destroyer of germs. Keep windows open in the bedrooms during the night, and air the rooms thoroughly during the day.

Care of the Paralyzed Child

If your child has had Infantile Paralysis and is paralyzed, ask your doctor what can be done to strengthen the weakened muscles and nerves. Proper care and treatment may prevent your child from remaining a cripple for the rest of his life. Often much can be done to bring back his health, usefulness and happiness.

Order Cards Now!

The Journal would be pleased to receive orders for personal greeting cards for the Christmas season. Orders may be given now and the cards delivered any time prior to Christmas to suit the convenience of the customer. We have several sample books with a wide variety of the latest cards, and a sample book will be left at your home to enable you to make a selection. Phone 203.

Custom endure, and people still call the up-and-down part of a skirt the "length."

Handsome Canadian Pacific Exhibits

(1) The Railway Building at the Toronto Exhibition. (2) A portion of the Canadian Pacific Exhibit. (3) Illustrated data indicating the growth of the C.P.R.

Throwing the spotlight on all its renowned activities, the Canadian Pacific Railway has again achieved success in its exhibit this year at the annual exhibition at Toronto. It is a busy spot for the visitor; for both the artist and the seeker after instruction and education find in this display a wealth of beauty and learning. Running from the ceiling down to a depth of about four feet was a circular panorama of the Dominion stretching from the Atlantic to the Pacific Coast. This frieze was designed by James Crockett of Montreal and executed by four other Canadian artists. In lovely color-tinted it gave an actual picture of the country through which the journey is made. At the base of this panorama the famous all-steel miniature Trans-Canada made its run. Spread out as on a stage was a large model of the St. Lawrence River with the Atlantic Empress steamships and smaller vessels entering and leaving the docks. In the foreground were prosperous looking farms, and across the river the city of Quebec with its winding streets and the towering Chateau Frontenac formed an absorbing picture. To link the East with the West

there was produced a working model showing the Banff Springs Hotel in its fairy-like surroundings. Here were seen the Canadian Rockies and the Bow River Valley in holiday mood. This beautiful castle of comfort in the heart of the mountains promotes the urge to see more of the country which lives in "Tiny automobiles" which the winding paths, trail blazes start off with their pack horses for snow-capped peaks, and the Stony Indian with his square seated outside their tepee helped to make the setting realistic. The Company's latest achievement in hotel construction was displayed in a model of the Hotel Saskatchewan in Regina. Covered wagons in the foreground told the story of man's advancement since the days when wagons were the only means of crossing the prairie. Special prominence was given to the new Canadian Pacific Hotel to be erected at Toronto. "The Royal York," which when completed will be the largest hotel building in the British Empire. Much interest is being displayed by the public in this new structure which will rise 23 stories above the street level and will be located directly across from

the new Union station. Other exhibits showed models of the Algonquin, Place Viger and Vancouver Hotels.

The Lands of Enchantment and Mystery discovered on the World Cruises were grouped in one colorful setting, with the hint of a cruiser sailing through the waters. All these scenes were reproduced so as to give an illusory perspective, and lighted with such changing effects as the dawn of day, the sunny noon, the deepening dusk and darkness.

Indicating the immense growth of the Canadian Pacific Express was a diorama on which was constructed a reproduction of the Company's present headquarters compared with a model of the original Express building in Winnipeg dated 1882.

In addition there was a wonderful collection of revolving transparencies in natural colors, also rows of these were placed waist high around the exhibit. Each transparency clearly told its individual story. In the centre of the building was a pillar around which are life-sized figures of natives of various countries in characteristic costume.

WORLD HAPPENINGS
BRIEFLY TOLD

Peter Verigin, the younger, has arrived from Russia to assume leadership of the Doukhobors in Canada.

The Canadian Government has proposed to Poland completion of a treaty of commerce and it is understood that negotiations will begin shortly.

Admiral Baron Sadaaki Kato, who commanded the Japanese fleet during the siege of Tientsin, China, in the World War, is dead. He was a former chief of the Japanese naval board of education.

Dr. Edward Sapir, Canadian anthropologist, has been appointed to a full professorship at the University of Chicago, where he is in charge of the department of sociology and anthropology.

Five new commissioners for cattle have been appointed in Saskatchewan. They are: Peter Gross, St. Bonaventura; William H. Bruce, Kelsey; John P. MacIntyre, Hobbart; Hugh Ellis, Saskatoon; and Walter W. Robertson, Saskatoon.

The memorial to Mount Richard Douglas Sandford, V.C., who drove the submarine G5, loaded with 15 tons of high explosive, into the pile work of the mole at Zeebrugge and blew a breach 150 feet wide, has been unveiled on the mole in Belgium.

Commander Richard E. Byrd says that he plans to leave New York next August on his South Pole expedition and that Floyd Bennett, who accompanied him on his flight to the North Pole, would be second in command of the party.

More than 1,500,000 gross tons of shipping, consisting of 6,500 motorships and steamers and 152 sailing vessels of 100 tons or more, were lost, broken up or condemned throughout the world in 1924, according to the annual world statistics report of Lloyd's Register of shipping.

Definite announcement was made at Calgary, Alta., that the Russian Government has removed arrangements for purchasing 4,000 horses in Western Canada, including British Columbia. The animals will be of a higher standard than those shipped last year, and higher in price.

Homestead entries for the first five months of the present year in the four western provinces total 2,231, as against 2,381 for the corresponding five months of last year. Saskatchewan leads the list with 1,038 entries, followed by Alberta with 512, Manitoba with 272, and British Columbia with 37.

Partly Filled Silo
Is Dangerous Place

Material When Settling Overnight Gives Off Deadly Gas

The partly filled silo also becomes a sort of a death-trap taking its toll of lives every year. Silage in the early stages of fermentation gives off carbon dioxide, dairy chemist at the Ohio Experiment Station, explained, gives off large quantities of carbon dioxide, which, if breathed instead of air, causes death.

This gas is heavier than air, and displaces air in the silo if not allowed to escape at an opening near the surface of the silage.

There is no danger when filling in actual progress, but there is danger, Mr. Perkins declared, when the filling is interrupted overnight or longer. Even when the doors are put in no faster than the silage is being filled, the silage may settle enough during the night to form an enclosed pit lighter than a man's head. The silo may thus become a death-trap by filling with carbon dioxide to the level of opening.

This gas does not transform air in color or appearance, and the victim who enters the silo may be overcome by the gas without being aware of its presence. Carbon dioxide is not a poison, but kills merely by excluding air from the lungs.

Removing the doors down to the level of the silage before entering after the filling has been interrupted will let the carbon dioxide flow away and be replaced by air. Running the cutter and fan for a short time, idle or in cutting, will agitate the gas and mix it with the air, rendering it harmless.

After fermentation is complete and the silo has been opened there is no further danger. First-aid measures consist in prompt removal of the person to fresh air and artificial respiration as in drowning.

If the average man was as good as he thinks other men ought to be it wouldn't be long until his vanity made him topheavy.

There are three million volumes in the United States Library of Congress.

W. N. E. 1700

Beauties Of Natural World

People Who See Them More Than Fortunate Says Viscount Grey
"Of all the joys of life which may fairly come under the head of recreation there is nothing more great, more refreshing, more beneficial, in the widest sense of the word than real love of the beauty of the world," writes Viscount Grey in "Faintly Papers."

"Some people cannot feel it. To such people I can only say, as Turner once said to a lady who complained that she could not see sunsets as he painted them, 'Don't you wish you could, madam?' But to those who have some feeling that the natural world has beauty in it I would say, cultivate this feeling and encourage it in every way you can. Consider the seasons, the joy of the spring, the splendor of the summer, the sunset colors of the autumn, the delicate and graceful beauties of winter trees, the beauty of snow, the beauty of light upon water, what the old Greek called the smiling of the sea."

When we are bored, when we are out of tune, when we have little worries, it clears our feeling and changes our mood if we can get in touch with the beauty of the natural world."

Old Popular Pastime
May Be Revived

Throwing Horseshoes Not Expensive and Tests One's Skill
The good old game of throwing horseshoes is being revived and bids fair to become one of the most popular pastimes of the day.

Volunteers of the game will be interested to learn that the world's record was set by a team from Birmingham, Illinois, when Mrs. John L. Lanza, former world's champion, pitched six consecutive double ringers, beating the former record of five and making an average of 832 points in one game.

The game of horseshoes is neither strenuous nor expensive, yet furnishes plenty of opportunity for testing one's skill and judgment along his own peculiar lines. So, if you are not in the golf class, try horseshoes.

Reaper-Thresher Machines
Being Introduced through the Irrigation District

Reaper-thresher machines are being introduced through the Irrigation district. One company carried over 54 machines from last year and brought in 275 additional this year, nearly all of which have been shipped out to farmers. The majority are going to Saskatchewan with a number to Alberta.

Wimpey Newspaper Union

Shows How Nictivation Transmits Pictures

Scottish Inventor Gives Demonstration For Benefit Of Soldiers
Many members of the British Association for the Advancement of Science seized the opportunity of nictivation, a modification made by John Z. Baird, the Scottish inventor, of his television system.

When the nictivation apparatus is used the subject whose image is to be transmitted sits in total darkness. In reality he is bathed in invisible infra-red rays. His image appears on the screen at the receiving end in a flickering, row glow, strongly reminiscent of the first moving pictures. The features are recognizable, but the infra-red produces a certain amount of distortion in color values.

As in television, in which the person at the transmitting end sits in the glare of an ordinary artificial light, the eye is tricked. What may be called a sliding and clapping machine optically reduces the reflection of the face to tens of thousands of fragments. Each fragment is converted into the electric impulse. At the receiving end the impulses are reconverted into light fragments, each of which is placed in its correct position on the screen. This process occurs with almost instantaneous rapidity, so that the eye does not realize that it is assembling an optical mosaic and accepting it as a whole.

There is reason why total darkness should reign in the transmitting room when the infra-red rays are sent. For nictivation, Mr. Baird wears his subject in the inkly gloom. In fact, he drives home the point that their counterfeits presenters are being sent by invisible rays.

Americans Buy Bank Stocks

No Significance Is Attached To Report That Control Is Sought
An announcement in New York of the formation of the two Canadian Bank investment trusts is not, apparently, creating uneasiness in official circles at Ottawa. Future developments will be followed closely, but the feeling is that the idea behind the trust is merely the bona fide one of investment.

American financial men, it is observed, are looking more and more to Canada as a field for investment, and, even at present prices, Canadian bank stocks offer a better return than American.

The Bank Act now provides that a majority of the directors of a Canadian bank must be British subjects resident in Canada. This provision, it is thought, would be sufficient to check any attempt to secure foreign control of Canadian banks. But should such an attempt be made, although in official circles it is not thought likely, and the provision in the Bank Act does not prove adequate, Parliament could step in with an amendment to the act which would impose still more rigid instructions on the directors.

Hobby Of Life Term Convict

A life term convict in San Quentin Prison, California, has asked for a bigger cell, basing his request on the flourishing condition of his prison hobby. Seven years ago he entered the prison and went about as a hobby would be necessary to break the monotony of prison life. So he set about to collect the best works of modern authors. Today his library is filling up his cell so he scarcely has room to move about. But the warden says he has no larger cells, even for libraries.

Fox hunters of the south do not kill their quarry with firearms, but practice the hunt as do the English sportsmen.

MISS TERESA CARRAGHER

First Aid Champion of Canada, who gave a demonstration at the Toronto Exhibition. Miss Carragher, who is an employee of the Canadian National Railways, in Edmonton, won the Peace Medal for the Women's Championship over the whole of the system.

SUNDAY SCHOOL LESSON

OCTOBER 2

ELIJAH ON MOUNT CARMEL

Golden Text: "Choose you this day whom ye will serve." Psalm 24:12.
Lesson: 1 Kings 18.
Devotional Reading: Isaiah 11:1-3, 9-11.

Explanations and Comments

I. Elijah's Meeting With Ahab, verses 1-25.—After three years of severe famine in Samaria because of the drought, Ahab called Obadiah, his superintendent, and told him to go in search of water for their perishing herds and flocks. He was met by Elijah, who ordered him to inform Ahab that rain was coming. Ahab came to meet Elijah. "Thou troublest Israel," were the king's angry words of greeting. Boldly, Elijah retorted that the king was the real trouble of the nation, for he had forsaken the commandments of the Lord and followed the gods of Baal.

This event is ancient days the age-long dispute continued among the people of the responsibility for evil among God's people. In Christ's day it was the Pharisees that he was troubled with, because they were subversive of the traditions of the elders. With Jesus day it was the expression of bigotry, intolerance, the spirit of anti-Christian intolerance and bigotry, however, it is still true. The most effective way to truth is by the presentation of facts in different views, the best is frustrated. Rev. C. S. R. O'Connell.

Then Elijah ordered the king to assemble on Mount Carmel all the priests of Baal and of the Ashterah. The king did the prophet's bidding.

Designs Gigantic
Air Liner

German Engineer Working On Plans For Super-Craft

Plans have been made by Dr. 161 must Rumpel, the German aeronautical engineer who designed the famous Taube, or Dove, monoplane for the German army, for a giant air liner with wings so expansive and thick that they will provide space for cabins with bathrooms, dining rooms, lounges and promenade-rooms—accommodating for 355 passengers. It is expected that this Titan of the air will be able to cross the Atlantic in 20 hours.

Actually, plans for this type of airplane were drawn several years ago. In general outline they are as good as they ever were, for aerodynamically they have not been changed by Rumpel, with the dawn born of his blueprint, is talking more confidently than ever of the day when air voyagers across the ocean will be as commonplace as steamship travel is now. He is too cautious to plunge boldly into the construction of a craft without careful preparation. He will reach his ideal trans-Atlantic airplane by easy stages. First, he will probably build a forty or fifty passenger plane, and finally his largest ship.

Although a plane of such fantastic size has never been built, the project must not be classed as impossible. Scientific and engineering research has never yet failed the designers of aircraft. The same laws of applied physics that enabled Bellanca to design the Columbia, and to produce from the plans how fast it would go, how much it would lift, at what angle it could climb, will enable future designers to calculate the wing spread, motor power, tonnage, tensile strength of the structural materials necessary for planes of far greater dimensions. Aeronautical engineering is an exact science; and expert counts the Wright brothers' first flight at Kitty Hawk shows that air planes are possible.

Then Elijah ordered the king to assemble on Mount Carmel all the priests of Baal and of the Ashterah. The king did the prophet's bidding.

Merchants requiring Christmas souvenirs or calendars for the Christmas trade may obtain same through The Journal.

Bob Pattinson entertained a number of his boy friends on Saturday last on the occasion of his fifteenth birthday anniversary.

Work is progressing rapidly on the new house being built for Frank Graham, on Fifth street, next to J. Emmerson's.

The L.O.B.A. will hold a tea and pantry sale in aid of the Wood's Home in the K.P. hall on Sat. Oct. 1. Tea served from 2 to 5 p.m.

Mrs. A. D. Currie is making steady recovery following her recent illness, and is now able to be around.

Work is being pushed to completion on the Polish Hall in East Coleman, and during the slack time at the mines many are giving their help in the work.

Order your personal greeting cards at The Journal office, and same will be delivered at your convenience any time prior to Christmas. Phone for sample book.

Mrs. W. White and son, Sydney, and Mr. and Mrs. Blower and son, of Coleman, Alta., visited Mr. and Mrs. D. A. MacKinnon on Friday last, on their way home from Spokane.—Kimberley Press.

Ethel Wilson, who has been taking Grade XII, course at Pincher Creek, received word this week that she had passed her Chemistry examination for which she recently wrote at Bellevue.

During the fight last Thursday one young enthusiast listening in became so enthused as the announcer was excitedly telling of the punches and wallups that were being exchanged that he started lunging out at the air in his excitement and almost fell "k-o-r flop" on the floor.

At York railway station, England, the arrival and departure of trains is being announced by loud radio speakers, which are heard above the roar of the traffic, even while engines are blowing and whistling. The announcements are made from the central signal box.

Miss Ada Cartwright is spending a few weeks holiday with her sister, Mrs. A. D. Currie, after being at the C. P. R. hotel at Lake Louise during the summer months. She leaves shortly to take up a position with the C. P. R. hotel at Winnipeg.

The walk up the hill from Fourth street, just by the tennis court, has been improved by the removal of most of the stones and pebbles, which was done by Mr. McLeod, father of Dr. McLeod, dentist, who has earned the thanks and appreciation of those who use the hill for his unselfish work.

It is expected that quite a number of quait games will be played off during the next week or two, including the competition for the Kellock cup. As there are quite a number of star players around Coleman, it is to be expected that competition in the various events will be very keen.

Fred Antrobus, Jr., left this week for McMaster University, Toronto, to take up three years study in Theology, after visiting his parents during the summer vacation. It is his intention later to enter the ministry of the Baptist church. Mr. Antrobus was for two years principal of West Coleman school.

The prize winners at the social held by the Rebekah lodge last Saturday evening were Mrs. Harry Boulton, first, and Mrs. Maurice Cook, consolation. Genie, H. Vincent, first, and Mr. Morris, consolation. These socials are held every Saturday evening in the I. O. O. F. hall.

SAVE YOUR EYES

Do you know that your vision is the most important of all your faculties

Do you realize that, according to the foremost psychologists, the five senses rank in the following importance:

Sight	87 per cent
Sound	7 per cent
Touch	3 1/2 per cent
Smell	1 1/2 per cent
Taste	1 per cent

Why Neglect Your Eyes Any Longer?

G. R. POWELL

Jeweler—Registered Optometrist.
